

* These counties had 5 or less cases and the relative rates calculation may be unstable.

**** Relative rates (RR) are the ratio of the jurisdiction rate to the state rate. For example, a RR of 0.5 means that the jurisdiction has half the observed rate than the state as a whole does. A RR value of 1.0 would be the same as the state and a value of 2.0 would be twice the rate than that observed for the entire state.**
